Blue River Seeds Ship Date May 2, 2022

Fertrell and Blue River are shipping my seed orders directly from Blue River to me. Therefore I'm setting a date that they plan to ship my seed orders to me. We want to wait as long as we can to get as many orders on that shipment as we can. But we want it soon enough that no one is late getting their seeds. Therefore, you need to place your Blue River Seeds orders by May 2th. Orders placed and paid for after the deadline will likely have an additional shipping charge added to the price.

If the weather is bad and we are having a late spring, we may extend the ship date.

Understanding the Price List

'Item Description' is a description of the product.

'Vendor' is who we buy it from.

'Regular Price' is regular full retail price.

'Sale Price' is the price when it's on sale. It's blank if there isn't a current sale for that product.

'Ton Trigger Qty' is how many you need to buy to get a price break. If it's blank, then I don't have a volume discount set up for that item. We use the word 'Ton', however it doesn't necessarily mean 2000#, but can be for any larger quantity.

'Ton Trigger Price' is the regular price for larger quantities.

'Ton Trigger Sale Price' is the sale price for larger quantities.

You can Mix or Match to get the ton quantity pricing (with exceptions).

There are two price lists: One intended for email and one intended for printing on paper. The paper version has only the most common items on it due to the cost of paper. If you wish for the more complete price list (email version) on paper, let us know and we can print one for you.

Martins Farm Supply
Organic Feed Mill
Certified Organic, Local, Quality

We are a small certified organic feed mill supplying feeds for homeowners and small farms. We source our grains locally whenever possible. When we can't source locally, then we buy from Lakeview Organic Grain in the Finger Lakes NY and other places as needed. We use Fertrell as our main mineral supplier.

We stock standard feed mixes like Layer, Broiler, and Pig feed. We can custom make most any feed mix you wish for. All our feed is whole or mash. We don't make pellets. We mainly use Fertrell for our ration support, however you can provide us with your ration as you please.

Our goal is to be able to provide you with a high quality product, for a good price, with good service.

If you are needing more than about 2 tons of feed at a time, consider buying from a bulk truck delivery company like Lakeview Organic Grain. We put all our feed into bags and totes.

It is common that we will have some extra feed left over when we make a custom feed mix. We commonly

give you the extra at the price of corn. Let us know if you don't want that extra.

It is common for a little bit of grain or feed to be in an auger, or for whatever reason, for some grain to get mixed in with another grain. For example, there may be a few kernels of corn in with the soy. Or it may be mixed right out of the field. For example, there may be some peas in with the oats. So don't expect 100% purity on feed grade grain.

We can refill your used bags. Please don't return torn bags or bags with dirt falling off of them. Be sure your name is on your bags so we know who they go to. We only use used bags for custom orders. If we use your bags, we strive to remember to also give you a bag credit discount.

Are you a certified organic grower with corn, soy, oats, wheat, barley, alfalfa, clover hay, etc for sale? Let me know. I may be able to buy from you. There are quality standards that need to be met — ask for details.
